Thank you, John. Yes...the page numbers on that template are awkward and huge!

Subject: Re: introductory/topical briefing on ethylene oxide

Lou et al.,
I have given a couple of briefings on EtO. I think the latest one was in June. So, I have an existing slide deck we can work from. Coincidentally, I think the slide deck is comprised of about 10 slides or so. I can circulate it on Monday or sooner if you would like.

Hi David and Ted,

In anticipation of the arrival of a new political staff member to take Richard Yamada's place, the IOAA is starting to prepare for briefings on high-profile ORD topics to orient our new addition to the front office. I've been asked to work with both of you on the development of a slide deck on ethylene oxide.

The idea is that these slide decks should be in the ballpark of 10 slides. Something that you talk from, more than rely on to provide all the content. The history is important, but we'll also need to fit in information on what's currently going on with EtO that is making this a current issue.

I'm hoping there are pre-existing materials you can pull from. I've attached a template to use for the new slide deck. We need to have this buttoned up by the end of next week (including some time for Jennifer to review). Let me know your thoughts, and when you might have a draft that we can take a look at (ideally Tuesday/Wednesday?). Feel free to call if you have any other questions. Thanks!

-Lou
